Project Name	SmartResume Generator: Customized Resumes for Every Opportunity
Maximum Marks	4 Marks

### Solution Architecture:

Solution architecture bridges the gap between business problems and technical solutions, ensuring the development aligns with user needs and project goals. The key objectives of solution architecture are:

- Identifying the best technological solution to solve the defined problem.
- Describing the structure, behavior, and critical features of the software to stakeholders..
- Outlining development phases, features, and technical requirements.
- Providing a roadmap for defining, managing, and delivering the solution effectively.
